How to Adjust Your Settings to Share Your Email Address with the KCNT1 Epilepsy Foundation

Sharing your contact/profile information allows us to see your email address so we know you are in this particular study. It helps us to connect the dots across multiple research studies, so that we know which studies you are participating in, and can provide you with easyto-access, personalized information about new and existing research opportunities. Follow these instructions to share your contact information.

From within your Child/Ward account, go to Menu > Settings > Privacy and toggle the switch ON.

Detailed Instructions:

First, navigate to your minor account's Dashboard. If you have already reached your minor's Dashboard you can jump ahead to <u>the next</u> <u>section</u>.

If you have not already,	https://id.lunadna.com/referrer/kcnt1-			
go to LunaDNA.com and	longitudinal?studyName=kcnt1longtermregstudy			
log in.
